

StoragePro™ RAID Setup Guide

Pocket II

Dock II

RAID MODE	1	2
RAID 1	off	off
RAID 0 Strip	off	on
RAID 0 Span	on	off

By default, the system is set to RAID 1 Mirroring.

To change to RAID 0, please do the following:

1. Change the RAID setup to RAID 0 by toggling the switches at the back of the unit. Refer to the table on the left.
2. Restart the machine. As the machine powers up, press and hold the black RESET button on the back of the machine.
3. Keep holding the button down (about 10-15 seconds) until the Red LED light stops flashing. Once completely, you may connect the system to your host computer.

***Please note: Changing the RAID mode will erase your data. Please back up your data properly before setup.**
